Education

Sri Krishna College of Technology, Coimbatore
B.Tech in Information Technology

CGPA: 8.1 / 10
2023 – 2027

Technical Skills

- **Languages:** Java, SQL, Python, C++
- **Backend:** Spring Boot, Spring MVC, Spring Security, REST APIs, JWT, JPA, Hibernate, Microservices
- **Database:** MySQL
- **Tools & Cloud:** Git, GitHub, Maven, Docker, Postman, Swagger/OpenAPI | AWS (EC2, S3), Vercel, Render
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Core CS:** Data Structures and Algorithms, OOP, SOLID Principles, Low-Level Design, System Design, DBMS, Operating Systems, Computer Networks

Projects

FinTrack Pro — Full-Stack Personal Finance Platform

GitHub | Live Demo
2025

React.js · TypeScript · Spring Boot · MySQL · JWT · Docker

- Developed a full-stack personal finance platform with **30+ REST API endpoints** supporting user authentication, income tracking, expense management, savings goals, and financial analytics.
- Built a secure backend using **Spring Security, JWT Authentication, JPA/Hibernate, Bean Validation, and MySQL**; implemented CRUD operations and API documentation using Swagger/OpenAPI.

E-Commerce Order Processing Backend System

GitHub | Live Demo
2026

Java · Spring Boot · Spring Security · JWT · MySQL · Docker · Swagger/OpenAPI

- Developed a production-grade backend with **40+ secured RESTful API endpoints** across authentication, product catalog, inventory, cart, order processing, payment, review, and category management modules.
- Implemented **Spring Security, JWT Authentication, and RBAC (ADMIN/CUSTOMER)** with protected endpoints, global exception handling, Bean Validation, and transactional order processing using **@Transactional**.
- Applied DSA-driven optimizations using **HashMap** for inventory lookups, **Stack** for cart undo operations, **Priority Queue** for sales analytics, and custom **Merge Sort** for product catalog sorting.

Parking Lot Management System — Low-Level Design

GitHub | Live Demo
2026

Java · OOP · SOLID Principles · Strategy Pattern · Singleton Pattern · Collections Framework

- Designed a scalable parking lot management system using **SOLID principles**, Object-Oriented Design, and modular architecture supporting multi-floor parking, ticket management, and parking spot allocation.
- Implemented **Strategy Pattern** for nearest-slot, best-fit, and EV-priority allocation, leveraging Java Collections Framework and design patterns for extensible parking operations.

Experience

Backend Developer Intern

May 2026 – Jun. 2026
Onsite

Aham Global Business Pvt. Ltd.

- Developed and validated **RESTful APIs** using **Java, Spring Boot, MySQL, and Swagger UI**, supporting backend business workflows and CRUD operations through a layered architecture.
- Implemented **JWT Authentication** and **Spring Security**-based role-based authorization, securing application access through protected endpoints and authentication workflows.
- Designed **MySQL** interaction layers using **Spring Data JPA** for data persistence and integration across modules; utilized **Git, GitHub, and Docker** for version control, containerization, and deployment workflows.

Achievements & Activities

- **4th Place** — Netrix'25 Codethon, KPR Institute: Outranked **100+ participants** in an algorithmic coding contest focused on advanced Data Structures and Algorithms.
- **Finalist** — Yugam 2025 Code Event: Qualified through multiple elimination rounds of competitive programming in Data Structures and Algorithms.
- **Participant** — Smart India Hackathon 2024: Developed an AI-powered **Gunshot Detection System** using sound localization and ML for real-time threat identification.
- **NLP Workshop** — Microsoft, Bangalore (2023): Gained industry exposure to transformer-based NLP models and enterprise AI pipelines.
- **400+ Problems Solved** — Arrays, Trees, Graphs, Dynamic Programming, Backtracking, and Sliding Window. Active FAANG-level interview preparation.
